- (6) An indication as to whether section 3504(h) of Public Law 96-511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Mr. Jeff Hill on (202) 395-7340 and to the Department of Justice's Clearance Officer, Mr. Robert B. Briggs, on (202) 514-4319. Extension of a Currently Approved Collection

(1) Judicial Recommendations Against Deportation; Controlled Substance Violations.

(2) Form: None. Immigration and Naturalization Service, United States Department of Justice.

(3) Primary: Individual or households. Other: None. A motion for a judicial recommendation against deportation is made by an alien convicted of a crime involving moral turpitude per 8 United States Code 1251 (b) and 8 Code of Federal Regulations 241.1. If the motion is granted, the crime cannot be used as a basis for deporting the alien per 8 United States Code 1251(a)(4). The motion is placed in the alien's Immigration and Naturalization Service file. Due to manpower shortages, the INS frequently does not send a representative to court. However, the INS needs to know the disposition of the motion made by the alien to the sentencing court. Requiring the alien to send a certified copy of the court docket entry granting or denying the motion will satisfy the INS' need to know the disposition of the case. This will aid in not placing unnecessary detainer on alien criminals and will help ensure that deportation proceedings will not be commenced in error.

(4) 3,000 annual respondents at .25 hours per response.

(5) 750 annual burden hours.

(6) Not applicable under section 3504(h) of Public Law 96-511.

Public comment on this item is encouraged.

SUPPLEMENTARY INFORMATION:

Background

The Bureau of Justice Statistics (BJS) Survey of Inmates in State Correctional Facilities was first conducted in 1974 and was followed by subsequent surveys in 1979, 1986 and 1991. These surveys have employed complex multistage samples to obtain comprehensive information on State prison inmates.

	Number of facilities sampled	Number of inmates interviewed
1974	190	8,869
1979	215	11,397
1986	275	13,711
1991	275	13,986

Through personal interviews with a nationally representative sample of State prison inmates, data were collected on individual characteristics of prison inmates, current offenses and sentences, characteristics of victims, criminal histories, family background, gun possession and use, prior drug and alcohol use and treatment, educational programs and other services provided while in prison, and other personal characteristics. These surveys have been BJS's primary source of detailed information on characteristics of State prison inmates. The data have been collected pursuant to 42 U.S.C. 3732. Many major publications have been written by BJS staff using the data from these surveys, including Survey of State Prison Inmates, 1991, NCJ-136949, Profile of State Prison Inmates, 1986, NCJ-109926, and Women in Prison, NCJ-145321. These publications as well as other reports from these surveys are available from the National Criminal Justice Research Service and can be requested by using the NCJ number.

Objectives

The purpose of this award is to continue this data series by procuring data collection services for the fifth Survey of Inmates in State Correctional Facilities. It is anticipated that the information collected will be essential to anyone needing detailed, authoritative information on characteristics of State prison inmates, particularly their offenses, criminal and other histories, and current conditions.

Type of Assistance

Assistance will be made available under a cooperative agreement.
